

ANANYA SHARMA

DATA SCIENTIST | MACHINE LEARNING | NLP | DATA ANALYTICS

Bhubaneswar, Odisha | +91-XXXXXXXXXX | ananya@email.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Computer Science postgraduate specializing in Applied Data Science and AI, with hands-on experience building end-to-end machine learning and deep learning solutions across structured and unstructured datasets. Proficient in Python, SQL, Scikit-learn, TensorFlow/Keras, Pandas, NumPy, Power BI, and Streamlit. Experienced in exploratory data analysis, feature engineering, model selection, hyperparameter tuning, NLP, model evaluation, and deployment. Built projects achieving 0.95+ R^2 in regression and 0.93 ROC-AUC in NLP classification.

CORE TECHNICAL SKILLS

Programming & Querying: Python, SQL

Data Science: Pandas, NumPy, SciPy, EDA, Data Cleaning, Feature Engineering, Statistical Analysis

Machine Learning: Regression, Classification, Clustering, Ensemble Methods, SVM, Model Selection, Hyperparameter Tuning, Cross-Validation

Deep Learning & NLP: TensorFlow, Keras, CNN, LSTM, BiLSTM, GRU, NLP, Tokenization, TF-IDF, Sequence Modeling

Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn

Databases & Tools: Microsoft SQL Server, MySQL, Jupyter Notebook, VS Code, Git, GitHub

Deployment: Streamlit, Model Serialization

SELECTED PROJECTS

Sarcasm Detection System | *Python, TensorFlow/Keras, NLP, LSTM, Streamlit*

- Built an end-to-end NLP classification pipeline using 28,617 news headlines, classifying content as sarcastic or non-sarcastic.
- Performed text preprocessing, tokenization, sequence padding, and vocabulary optimization using a 20,000-word vocabulary and maximum sequence length of 20.
- Benchmarked TF-IDF + Logistic Regression, LSTM, BiLSTM, and GRU architectures.
- Selected LSTM as the final model after comparative evaluation.
- Achieved 85.05% test accuracy, 81.64% precision, 88.52% recall, 84.94% F1-score, and 0.932 ROC-AUC.
- Packaged the trained model, tokenizer, and configuration for inference and deployed an interactive Streamlit application.

House Price Prediction | *Python, Scikit-learn, Regression, Hyperparameter Tuning*

- Developed a supervised regression pipeline for predicting house prices from structured property data.
- Performed data preprocessing, categorical encoding, feature scaling, exploratory analysis, and model comparison.
- Evaluated Decision Tree, Random Forest, Extra Trees, and Gradient Boosting regression models.
- Optimized Gradient Boosting hyperparameters to improve generalization performance.
- Achieved 0.953 test R^2 and 160.52 test RMSE with the tuned Gradient Boosting model.

BlinkIT Sales Analytics | *SQL, Microsoft SQL Server, Power BI*

- Analyzed 8,500+ retail transactions using SQL-based data extraction and aggregation.
- Developed analytical queries to examine revenue, product categories, outlet characteristics, and sales trends.
- Designed an interactive Power BI dashboard with KPI cards, slicers, and business performance visualizations.
- Transformed raw transactional data into insights suitable for business performance monitoring.

Airline Price Analysis | *Python, Power BI, Tableau, EDA*

- Investigated airline pricing patterns across airlines, routes, travel classes, and days remaining before departure.
- Performed exploratory analysis to identify relationships between travel conditions and ticket prices.
- Developed interactive dashboards using Power BI and Tableau.
- Used dynamic filtering to enable analysis across airlines, classes, routes, and booking windows.

EDUCATION

M.Sc. Computer Science — XYZ University | 2024–2026

B.Sc. Computer Science — ABC University | 2021–2024

SPECIALIZATION

Applied Data Science and AI — E&ICT; Academy, IIT Guwahati

Coursework: Python for Data Science | EDA | Machine Learning | Deep Learning | Data Visualization | Artificial Intelligence | NLP

CERTIFICATIONS

Applied Data Science and AI — E&ICT; Academy, IIT Guwahati

Machine Learning | Python for Data Science | Data Analytics
